

CL900 Healthcare

THE MOTION CL900: TRANSFORMING POINT-OF-CARE TECHNOLOGY

The Motion CL900 is a durable, lightweight, purposefully equipped tablet that's ideal for healthcare providers who need to increase productivity, streamline workflows and ensure precise adherence to institutional protocols and government regulations.

While the Motion C5v sets the standard for the most demanding medical environments, the CL900 helps hospitalists, therapists, rounding pharmacists and other mobile clinicians benefit from a smaller, lighter, and lower-cost tablet that meets all of their mobile computing needs.

With the CL900, clinicians benefit from technology that can deliver non-stop access to the critical, real-time information and applications they need to reduce errors, simplify compliance, and enhance patient care.

DURABLE, POWERFUL AND READY TO WORK

Every Motion CL900 comes out of the box ready to work. **Weighing less than one kg¹**, the CL900 helps clinicians and physicians work faster, smarter and more effectively, providing the capabilities, applications, and ergonomic ease of use they need to be more productive in today's decentralized healthcare environments.

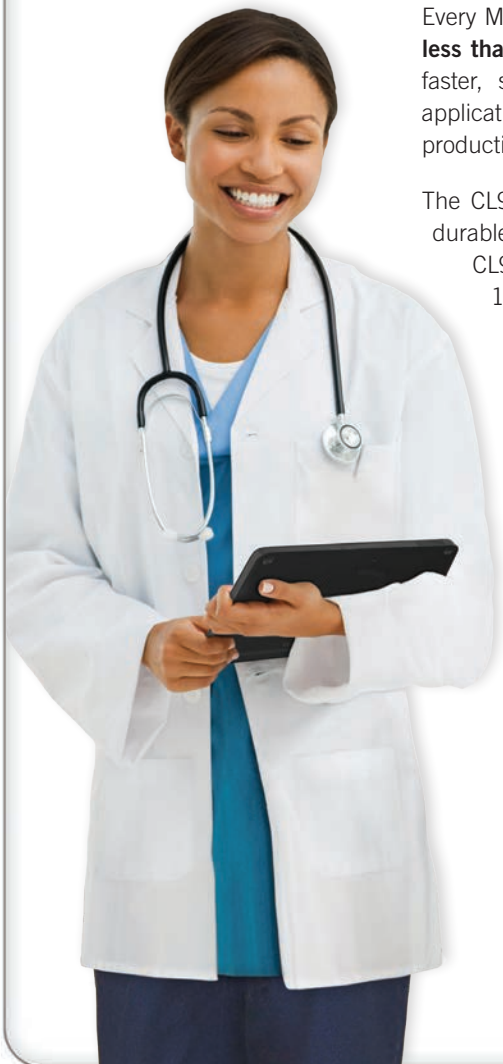

Take your CL900 with you no matter where your work takes you.

The CL900 is designed for the challenging conditions healthcare workers face every day and is more durable than any other comparably priced tablet. Built around an internal frame for structural rigidity, the CL900 is MIL-STD-810G and IP52 tested for durability, and is easy to clean. And the CL900 is the first 10-inch tablet equipped with **Corning® Gorilla® Glass**, the resilient display material renowned for its lightweight strength and durability. So the display is as tough as it is brilliant, delivering crisp, colorful graphics that stand out even under harsh fluorescent lighting.

The CL900's dual touch input enables physicians, nurses, therapists and other clinicians to input data using both **multi-touch** and **active stylus²**. So it's easier than ever for clinicians to complete forms, enter instructions and submit data at the bedside. With the integrated digital camera, clinicians can quickly add images to the electronic medical record (EMR) or collaborate with other caregivers using the web camera.

The CL900 features the **Intel® Atom™ Z670 processor**, which is specialized for tablet PCs and provides the ideal balance between power and battery consumption. As a result, the CL900 enables clinicians to simultaneously consult drug references on the web, run EMR applications, and collaborate with other healthcare providers via email. And since all Motion Tablet PCs are built to run on Windows® 7, there's no need for your IT department to rework infrastructure, support a new OS, restrict manageability or sacrifice security.

The Motion CL900

Ultra Mobile, Durable
and Built for Healthcare

NON-STOP MOBILITY, CONNECTIVITY AND PRODUCTIVITY

The CL900 helps clinicians to be more efficient and effective – no matter where their work takes them or what they need to accomplish. By combining a lightweight, ergonomic design with an **extended battery life of up to eight hours³**, clinicians can easily carry and use the CL900 throughout their work day. And Motion's industry-leading charging technology provides a work-to-charge ratio that reduces downtime.

Mobile clinicians can't afford to be disconnected. That's why the CL900 offers a range of reliable connectivity options. With the CL900, users can capture or access real-time patient information at the point of care using integrated **Bluetooth[®], WLAN or Gobi™ 3G mobile broadband**. As a result, clinicians can distribute secure, real-time patient data to the entire healthcare team, without ever leaving the patient's side.

GET MORE FROM YOUR POINT-OF-CARE TECHNOLOGY

The CL900 is helping healthcare providers dramatically boost productivity by empowering clinicians with a potent combination of resilient, reliable hardware and powerful technology that simplifies and accelerates every part of every task, from reducing information delays and inaccuracies to simplifying compliance procedures. And the CL900 can be tailored and optimized to work within the application, workflow and facility constraints of any healthcare institution. Most importantly, the CL900 helps healthcare providers improve patient care where it's needed most, at the patient's side.

THE CL900. No COMPROMISES.

It doesn't take a "genius" to understand that while some tablets are great for having fun, when it comes to the daily grind of real clinical work environments they just don't make the cut. That's where Motion delivers.

We don't stop at building a better tablet PC. We keep working until we build the best. The best design for users in demanding clinical environments. The best balance of weight and ergonomics. The best efficiency and extended battery life. The best, most resilient connectivity. Simply stated, we build the best tablet PC for healthcare.

FEATURES AND BENEFITS

Adaptable and Configurable

- Standard front and rear facing cameras
- Optional countertop docking station includes expandability options
- Flexible carrying solutions
- Convenient dual input (multi-touch and optional active stylus)

Resilient Display

- Delivers clear visibility even in bright sunlight
- 10.1" screen featuring HD 1366 X 768 resolution
- Added durability with Corning® Gorilla® Glass

Durable Form Factor

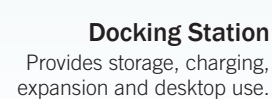

- Meets MIL-STD-810G
- Works in challenging conditions (IP 52 tested; dust and splash resistant)
- Standard Solid State Drive (SSD)

ACCESSORIES TO MEET EVERY NEED

Carrying Cases

Protect and transport your CL900 with a variety of cases made specifically for the CL900.

Docking Station

Provides storage, charging, expansion and desktop use.

Active Stylus

Enables handwriting and small target navigation and conveniently stores in the tablet's integrated pen bay.

Lightweight and Highly Mobile

- Weighs less than 1 kg (2.1 lbs)
- Delivers up to eight hours of battery life
- Built-in wireless connectivity (mobile broadband with GPS, Bluetooth[®], WLAN)

CPU Designed Specifically for Tablet PCs

- Intel® Atom™ Z670 processor
- Delivers high-quality video and graphics
- Uses less power and provides longer battery life
- Runs Windows® 7 Professional for business integration

¹ Weight represents approximate system weight. Actual system weight may vary depending on component and manufacturing variability.

² Active stylus for pen input available as an optional accessory.

³ Battery life varies by configuration, applications in use, utilized features and operating conditions. Motion battery life estimates based on MobileMark® 2007 performance testing.
